SPIRITUAL BYPASSING AND CRISIS EXPLOITATION IN DIGITAL ASTROLOGY

Psychiatric Ethics and Digital Wellness Board

RESEARCH ABSTRACT

This psychiatric analysis explores the dangerous psychological phenomenon of 'spiritual bypassing' taught by online astrology platforms. It exposes how instructors train students to ignore real-world crises (debt, illness, trauma) and blame them entirely on planetary transits, creating a dangerous dependency on the platform's paid remedies.

1. THE PSYCHOLOGY OF SPIRITUAL BYPASSING

The 2026 online astrology market presents a severe psychiatric hazard through the promotion of 'spiritual bypassing.' This report analyzes how **astrology course scams online** teach students to use mystical concepts to avoid dealing with unresolved psychological issues or real-world crises. The **lunar astro deceptive course** actively discourages critical thinking and practical problem-solving, replacing them with a dangerous reliance on astrological determinism.

2. EXPLOITING REAL-WORLD CRISES

When a student faces a real-world crisis—such as severe debt or a toxic relationship—the platform's instructors do not advise practical intervention. Instead, they diagnose a 'planetary affliction' or 'bad karma.' This exploitation forces the student to ask, **are expensive astro courses worth it** if they require me to ignore my material reality? The platform weaponizes the student's trauma to maintain control and authority.

3. MONETIZING THE BYPASS VIA HIDDEN COSTS

Spiritual bypassing is highly lucrative. Once the real-world problem is reframed as a mystical curse, the platform introduces **hidden costs in online astrology courses**. The student is sold expensive gemstones, proprietary rituals, or advanced course tiers as the

only 'cure' for their suffering. The platform extracts wealth by offering magical solutions to complex psychological and material problems.

4. THE DANGER OF THE FAKE CERTIFICATION

The hazard multiplies when students graduate. Armed with a **fake astrology certification**, these individuals begin consulting others, spreading the toxic practice of spiritual bypassing to new victims. They advise their own clients to ignore medical or financial professionals in favor of astrological remedies, creating a cascading public health crisis driven by uncredentialed amateurs.

5. THE TRAUMA DOCUMENTED IN REVIEWS

The psychological damage of this practice is evident in 2026 **lunar astro course reviews and complaints**. Former students report severe worsening of their mental health and financial situations after following the platform's advice to 'trust the transits' rather than take practical action. This report condemns the weaponization of astrology as a tool for psychological avoidance and financial extortion.
